

Francisco Sanchez

ENVIRONMENTAL EDUCATOR AND MANAGER

Spain

✉ sensing.nature.franzisz@gmail.com | 🏠 sensing-nature.github.io | 📷 sensing-nature

I am a versatile and self-confident person in new environments. I am quite independent, autonomous and self-sufficient, but also friendly, social and open-minded. I face everything with a positive attitude, smooth communication and a sense of empathy with people that is matchless, so I am resolute in problem solving. I consider myself a creative person, a wild adventurer and a cultural traveler. I have developed interpersonal skills as an Environmental Educator, so that allow me to teach people about nature by designing environmental programs with educational activities for community participation. As an Environmental Manager, I have learned to make high quality reports based on environmental data for compliance with environmental legislation, as well as sustainability strategies and campaigns with green marketing promotion to public entities and private companies, so I know well how to identify and deal with ecological problems throughout environmental actions such as circular economy plans, environmental impact assessments, life cycle assessments, energy savings and ecological footprint audits, among others, for finally stopping global warming, human waste, energy crisis, deforestation, biodiversity loss, air, water and land pollution. I really enjoy creating outdoor social media content to promote environmental awareness. I also have a background in electronics and programming, so I often build inexpensive technological devices with microcomputers to extract useful and valuable environmental information.

Employment

Nature Guide

WILDLIFE & PHOTO

Granja de Torrehermosa - Spain

March 2022 -> March 2022

Fruit Picker

X. DUVAL & FILS

Epernay - France

September 2021 -> October 2021
